## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-31, drawn to means for detecting a plastic sheet extending outwardly from the discharge end of the conveyor, classified in class 198, subclass 464.1.
  - II. Claims 32-39, drawn to a method of allowing the trim press to draw a section of the plastic sheet, classified in class 83, subclass 13.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions groups I and group III are related as process and apparatus for its practice.

The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus can be used to practice another process, for example, the means for detecting a plastic sheet extending outwardly from the discharge end of the conveyor can be used in a <sup>process</sup> ~~apparatus~~ for packaging products instead of trim pressing.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3724

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
